Quality Measures in CO
Insights from the Colorado All Payer Claims Database interactive public reports @ www.civhc.org

Overall

Prescriptions for Asthma
89% of Coloradans receive appropriate prescriptions for asthma

Trends

Colorectal Cancer Screening
Only 28% of Coloradans get colorectal cancer screening

Breast Cancer Screening
Women in rural counties have a lower percentage of breast cancer screening than women in urban counties. (all payers, statewide)

Diabetes A1c Testing
1 in 4 diabetes patients DO NOT receive their A1c test at least once a year. (all payers, statewide)

Colorectal cancer screening and cervical cancer screening have both increased in the Commercial population since 2012, but have declined in the Medicaid and Medicare Advantage Populations.

Across all payers, more patients are receiving breast cancer screening than they did in 2012.

Colorectal Cancer Screening

Medicaid & Medicare Advantage

**Trends**

**Diabetes A1c testing from 2012-2015 varies greatly by payer.**

- Commercial fell 3%
- Medicaid rose 15%
- Medicare Advantage fell 17%

**Geographic Variation**

**Southeast CO** has the highest percent of people receiving appropriate prescriptions for asthma.

Denver Metro Counties, as well as Boulder and Mesa Counties, have the highest percent of colorectal screenings, yet over 60% of people in these areas still do not receive a screening.

In 14 rural counties, 60-78% of women do not receive breast cancer screenings.
