Breast cancer is by far the cancer with the highest prevalence (0.79%), followed by prevalence of cervical cancer (0.21%).

The cancers reported tend to be more prevalent in the older population (65+ yrs.)...

...with the exception of cervical cancer, which is more prevalent among women (35-64 yrs.).

The 35-64 yrs. population covered by Medicare Advantage has the highest prevalence of all cancers reported.*

Cancers tend to be more prevalent in rural counties among the Medicare Advantage and Medicaid populations.

*Populations covered by Medicare Advantage represent individuals with complex conditions and can include those under age 65.
